## SUMMARY

---

Computer Science student focused on Python and web technologies, with hands-on experience building projects in React, Flask, and MongoDB. Interested in problem-solving, web scraping, AI/ML and interactive web applications. Actively improving skills through project-based learning in web technologies and data-driven applications. Seeking an internship opportunity to apply skills in a real-world engineering environment and continue growing as a developer.

## EDUCATION

---

### COMSATS University Islamabad

*Bachelor of Science in Computer Science, CGPA 3.91/4.00*

Islamabad

*Feb. 2024 – Present*

## PROJECTS

---

### E-commerce Web Application | *Flask, MongoDB, Python*

- Built an e-commerce system with modules for product, user, and order management
- Implemented CRUD operations, indexing, and pagination for efficient data handling
- Applied transactions and locking to maintain data consistency
- Integrated input validation and SQL injection protection

### Smart Hospital Appointment Management System | *React.js, JavaScript, Node.js, Express, MySQL*

- Developed a hospital appointment system for booking, scheduling, and patient management
- Implemented form validation and appointment handling workflows
- Designed interfaces for viewing doctors and available appointment slots

### React Smart Travel Booking Dashboard | *React.js, JavaScript, CSS*

- Developed a travel booking dashboard with search, listing, and booking modules
- Built a responsive interface for seamless user experience across devices
- Created reusable React components for forms, cards, and navigation

### House Price Prediction using Machine Learning | *Python, Selenium, BeautifulSoup, Pandas, Scikit-learn*

- Built an ML pipeline using property data scraped from Zameen.com
- Performed data cleaning, preprocessing, and feature engineering
- Trained and compared six regression models using standard evaluation metrics
- Developed a system to predict house prices from property features

### Email Extractor using Web Scraping | *Python, BeautifulSoup, Regex*

- Built a web scraper to extract email addresses from web pages
- Parsed HTML content using BeautifulSoup for data extraction
- Applied Regex patterns to identify and validate email formats

## TECHNICAL SKILLS

---

**Languages:** Python, JavaScript, C++, Java, SQL, HTML, CSS, Assembly

**Frameworks and Tools:** React, Node.js, Bootstrap, Postman, Flask, MongoDB, Git, FastAPI

**Libraries:** pandas, NumPy, BeautifulSoup, Selenium, Python re Module

## CERTIFICATIONS

---

**Python for Everybody:** From University of Michigan (Coursera)

**Programming with JavaScript:** From Meta (Coursera)
